Many people enjoy the action and learn the skill needed to play live action games. One of the most popular is flight simulators, where you can spend the afternoon spinning your computer to shoot down enemy MIG's. We've watched some of the top-notch combat flight simulator games on the market. Rise of Flight is the latest PC flight simulation title to set a new standard of loyalty, beauty and realism. The game puts you right in the pilot's seat of the largest World War 1 aircraft (Spad 13.C1, Fokker D. VII, Albatros D. Va and Nieuport 28.C1). Historical references and modern computer graphics were combined to make more than 100,000 square kilometres of rural France, spoiled by a terribly cratered battlefield. You can get through the ranks from green lieutenant to colonel. There are plenty of combat flight simulator add-ons available for the world's most popular flight simulator software (see below). If you don't own a power-house computer, it's a good idea to check Microsoft Flight Simulator 2002 for the use of combat flight simulator add-ons. Fight online in some of the biggest battles of World War II, including Midway, The Battle of Britain and Pearl Harbor. Falcon 4.0 is a version of the highly popular F-16 flight simulator software. Tasks can be as simple as navigation training or as complex as a multi-goal campaign. Up to four teams can fight in one arena. Part of Jane's famous flight simulator collection, Attack Squadron is a World War II simulation where you can master several historical aerial battles. Campaigns combine one-style tasks and give you the role of team leader, while quick tasks allow you to set a few parameters and jump into battle. Flight simulators and aircraft combat games serve a solid nich for those of us who want to go to the sky when we don't do other things on our computers. Here's a rounding of today's loaded peaks with prices from free to reasonable and a focus from arcade-style action to highly realistic flight simulation. They're not just great games, they're the best Mac games you'll find. X-Plane is without peers on Mac. Calling the X-Plane a game isn't just wrong, but it's insulting: the X-Plane is the ship's ultimate flight simulator. Intricately detailed, it's also incredibly scalable - the X-Plane works on mobile devices. oz77n home Macs and computers, and also serves as a detailed professional aviation simulator. more than 30 aircraft are available: You can fly everything from the single-engine Cessna 172 – the world's most popular aircraft – to the B-2 bomber. Application models for fixed and rotating wing aeroplanes, as well as tons of atmospheric conditions affecting flight. It even simulates what it would be like to fly a space shuttle. More than 1,400 other aircraft models can be downloaded from the network. And you can fly almost anywhere: Land at over 33,000 airports around the world, land on an aircraft carrier and more. A free demo is available, so don't let the price tag scare you. Given the incredible level of detail and the huge ecosystem that supports the X-Plane, it's worth the money if you take your flight simulation seriously. FlightGear Open Source Flight Simulator FlightGear is a little more do-it-yourself than some of the other apps on this list, but it's still significant and definitely worth checking out. You download the central application, airplane models and scenery separately. Hundreds of aircraft models are available for download. FlightGear's rough open source edges show, but if you're a developer or code tinkerer, it's fun here. And for everyone else, lots of fun planes to fly and scenery to explore. WarBirds Total Sims' WarBirds air combat game has been in the conurbation since 1995. Take to the skies behind the ike of dozens of legendary World War II-era aircraft. Singleplayer mode consists of 20 training modules, 12 quick tasks and five different free flight modes. Moreover, you can play offline for free as long as you want. But the real meat of this game is in the online game, for which a monthly fee is charged to continue playing. You're going to be raiding other real-life players' squadrons while World War II is being re-fought. Total Sims is a bit funky with its Mac support; Their FAQ refers to Apple's GameSprocket technology, which went out the door when Classic Mac OS gave way to OS X more than a decade ago. But it shows how long WarBirds has been on the platform as well. \$13.95 (monthly, free offline game) - Download now Falcon 4.0: Allied Force Graphic Simulations has been making flight simulations for macintosh since the early 1990s. Arm your planes with realistic weapons and battlefields and then fly missions deep into hostile territory with a dynamic campaign engine that changes things every time you play. Sky Gamblers: The entrance to Storm Raiders Atypical Games is absolutely essential if you want dogfight in the style of World War II. The game has great graphics and easy to understand the gameplay. There are one-player assignments here, but where the game really shines is in the multiplayer dogfighting battle that has been the strength of the series. Various online game modes test your skills, including Capture The Flag and Last Man Standing. Sky Gamblers supports iCloud and Game Center - any progress made in the game can be stored in the cloud. It also supports a joystick or gaming platform, which I think is a must for all flight simulations. \$5 You've got a lot of games to play, but in app purchases, you can unlock new customization features and new airplane models. F/18 Carrier Landing II Pro It's clearly the gateway to a game that originated from iOS, but it's fun nonetheless. Aircraft carriers and runways fly from aircraft carriers and runways: the F-A/18 Super Hornet, the F-14 Super Tomcat, the F-16 Fighting Falcon and the MiG-29K are all represented with Harrier, F35B Lightning II and others. RORTOS calls itself the manufacturer of the most advanced flight simulations for mobile devices, and they are quite snazzy on Mac too. More than thirty missions, half a dozen training missions and a free flight so you can buzz alone without an agenda. Head held high, virtual pilots. This is my favorite list right now, but I'm sure I've left out some that you love too. Let me know in the comments! We may earn a purchase test with our links. Learn more. More.
